ABOUT

The Band

MOONLIGHT SEEKERS are a rock band from **the Laurentians** who forge profound connections through electrifying live performances. Their sound channels the raw energy of early **Cage the Elephant**, the gritty rock of **The Black Keys**, the heavyweight swagger of **Led Zeppelin** and the timeless songwriting of **Tom Petty**, all with a groovy hip-hop undertone.

Their debut album **PERSPECTIVES** (2025) captures that energy in full: seven tracks of lively, impactful songwriting where intuitive rhythms and bass lines meet saturated, soaring guitar and a powerful lead vocal. Recorded at the legendary **Wild Studio** in St-Zénon, produced by **Rick Blanchard** (**Rick et les Bons Moments**), mixed by **Jace Lasek** (**The Besnard Lakes**), and mastered by **Philip Gosselin** (**Le Lab**).

What's Next

This collaboration signals a bold and inspired shift: a rawer sound, sharper contrasts, and renewed emotional depth.
